The foregoing Table explained.

OTE, That the Moon's Age being taken notice of by the Rule in this Table, you may obtain the Time of High-Water at all the Places above-named. Observe, When the Moon is one of freeen Days old, it is High-Water at London, Tinmouth, Hartlepool, &c. at 3 o'Clock, and 48 Minutes past. Observe the same of the rest, which is plain to the meanest Capacity. The Day of the Moon's Age you have in the fifth Column on every lett-Hand Page of the Almanack.

A plain and easy TABLE of Simple Interest, at Five Pounds per Cent from Five Shillings to a Thousand Pounds; and, to avoid Fractions it is fitted to the meanest Capacity, as near the Truth as possible.

INTRODUCTION,

Addressed to all my READERS, in the Praise of a good Conscience, the only certain lasting Good, fince the only one in our own Power, and out of all others.

TN vain Fools think all true Felicity In Wealth, and Honours, outward Goods, do he; In cloying Pleasures, and in tiresome Ease, When 'tis but in the found Mind's Rest or Peace. To which with Wealth or Power we ne'er attain, But by a quiet Heart, and fettled Brain. Which gives us, in all Fortunes, our Content, Se proves our fole, fafe, fure Eftablifhment, And doth ensure the Good, and Bad prevent. Without Content, Good Fortune were in vain, But by Content we Happiness obtain, Since our Content, ev'n in our Loss, is Gain. For Peace of Mind is Rest and Heav'n here, Securing Man from Trouble, Care, or Fear. Which Power, Pride, Plenty, but most oft increase, As our Wants with our Avariciousness, To make by Plenty, Satisfaction less. So 'tis our Store of Virtue, not of Wealth, Which gains and keeps our Mind's Eafe, Body's Health; Our Temperance of Mind, or Appetite, Which makes our Scorn of Pleature our Delight; Which does in War fecure our Peace of Mind, In Trouble makes us Satisfaction find. Free though in Gaol, and though in Pain at Eafe, No Quarrel fear, by keeping our own Peace; Which Men can't have by Fortune's Goods (we find). But by the best Goods, his good Heart and Mind. So Man's good Conscience is its own Relief, From Passion, Shame, Misery, Fear, or Grief : From Nature's Debt to Death, the bleft Releafe, Whilft Wealth without it makes Man less at Ease.

All Persons that write unto me upon their own Business especially on Points of Curiosity, wherein I can expect no Profit are desired to pay the Postage of their Letters, or they will not be answered by their humble Servant, Thomas WRIGHT, Eaton, Leicestershire.—June 16, 1768.

INTRODUCTION,

Addressed to all my READERS, in the Praise of a good Conscience, the only certain lasting Good, fince the only one in our own Power, and out of all others.

N vain Fools think all true Felicity In Wealth, and Honours, outward Goods, do he; In cloying Pleasures, and in tiresome Ease, When 'tis but in the found Mind's Rest or Peace. To which with Wealth or Power we ne'er attain, But by a quiet Heart, and fettled Brain. Which gives us, in all Fortunes, our Content, Se proves our fole, fafe, fure Eftablifhment, And doth ensure the Good, and Bad prevent. Without Content, Good Fortune were in vain, But by Content we Happiness obtain, Since our Content, ev'n in our Loss, is Gain. For Peace of Mind is Rest and Heav'n here, Securing Man from Trouble, Care, or Fear. Which Power, Pride, Plenty, but most oft increase, As our Wants with our Avariciousness, To make by Plenty, Satisfaction less. So 'tis our Store of Virtue, not of Wealth, Which gains and keeps our Mind's Eafe, Body's Health; Our Temperance of Mind, or Appetite, Which makes our Scorn of Pleature our Delight; Which does in War fecure our Peace of Mind, In Trouble makes us Satisfaction find. Free though in Gaol, and though in Pain at Ease, No Quarrel fear, by keeping our own Peace; Which Men can't have by Fortune's Goods (we find), But by the best Goods, his good Heart and Mind. So Man's good Conscience is its own Relief, From Passion, Shame, Misery, Fear, or Grief: From Nature's Debt to Death, the bleft Releafe, Whilft Wealth without it makes Man less at Ease.

All Persons that write unto me upon their own Business especially on Points of Curiosity, wherein I can expect no Profit are desired to pay the Postage of their Letters, or they will not be answered by their humble Servant, Thomas WRIGHT, Eaton, Leicestershire.—June 16, 1768.

IT is necessary to be remembered, That by Virtue of an Act of Parliament made in the Year 1751, for Alteration of the Stile, the Beginning of the Year was changed from the 25th of March to the first Day of January. This Change took place on the first of January, 1752; and the Act enjoins and directs, That from and after that Time, every succeeding first Day of January, in every Year to come, shall be the first Day of every Year respectively; and that all Deeds and Writings,

of what Nature and Kind foever, shall be dated accordingly.

In Confequence of the fame Act of Parliament, the Use of the Julian Account or Ol | Stile, heretofore followed in this Country, ceased on the Second of September of the same Year, 1752; and by dropping or leaving out eleven nominal Days, and calling the next, which would have been the third, the fourteenth, the New Stile took place; and from thence, by the faid Act, is directed to be used for all Time to come in all his Majesty's Dominions subject to the Crown of Great-Britain, By this Alteration, the feveral Fixed or Immoveable Feafts, as they are erdered to be placed in the New Calendar upon the same nominal Days of the respective Months as they were placed upon in the Old, will come eleven Days earlier than they would otherwise have done, and thereby make all Things depending upon them, fuch as the Opening or Inclofing of common Fields and Pastures, the Holding of Fairs and Marts, the Payments of Rents and Annuities, and the Commencement or Extinction of many private Rights and Matters of Property, do the same: To prevent therefore any Inconvenience arising therefrom, the Act provides and directs, That the Opening or Inclofing of Pastures, the Payments of Rents, Annuities, and all other Things depending on the Fixed or Immoveable Feafts, shall not by this Means be accelerated or forwarded; but that the Days of Opening or Shutting fuch Pastures, of paying such Rents or Annuities, and of doing such other Matters and Things formerly to be done and performed on the faid Feafts, shall be Kept, Observed, and Performed on the same Natural Days of the Year on which the same Fe fts would have fallen if this Act had not not been made. For this Reason the fifth of April is called Old Dady-Day, and the 10th of October, Old Michaelmas-Day, and fo of the rett, as being the respective Days on which all such Rents and Payments become due, such Rights take place, and such Matters and Things to be done, and not before. All that is here faid relates to the feveral Things above-mentioned depending on Fixed or Immoveable Feasts; but all such as depend on Moveable Feafts, or Days depending on them, are to take place, and be reckoned according to the New Calendar, in Pursuance of an Act of Parliament of the Year 1752, for amending the former Ad of the Year 1751.

N. B. That all Dates of Births, Deaths, or other remarkable Events in the Regal or Chronological Tables, prior to, or upon the Second of September, 1752, are to be understood according to the Julian Account.

or Old Stile.

Lands surveyed, divided, and enclosed, and Maps of the same correctly delineated, and Timber and Polewood surveyed, valued, and sold, by VINCENT WING, of Pickworth, in the County of Rutland, and THOMAS WRIGHT, of Eaton, in the County of Leicester, Practitioners in the Mathematicks.

This Poem is continued from my Introduction.

This Poem is continued from my introduction.

But he must live well in the poorest State,

Who still contented is with his own Fate,

In spight of Fortune, be most Fortunate.

Since Peace of Mind, Ease, Rest, Security,

Are all that Power can give, or Wealth can buy.

MARCH hath XXXI Days,

With Avarice, increasing Misery,
To make our Rich want more our Insamy,
But as it is more wilful Poverty.
So it is not good Luck, but the good Mind, that
Makes the good Life, and the most happy State,
Rewards itself so best, in Spight of Fate.

Our Crimes may 'scape the Judges and the Law, But Conscience our own Lives will judge and awe, Within itself, will to its own self, do Justice, itself condemn, and punish too. Is to its own Crime so, but most severe, Since its own Judge and Executioner.

AUGUST hath XXXI Days.

Our only stable, certain happiness,
Good Fortune cannot add to, bad make less.
Heav'n, and eternal Rest, which here below,
As that above, but less great rich Men know,
The Poor, in spite of Fate, can on themselves bestow.
Thus the good Conscience still is understood,

SEPTEMBER hath XXX Days.

To be the best of all things reckon'd good. Since other Goods in Fate's Power are alone, But our good Conscience only in our own, Without which, even all Happiness were none. Since Happiness is truly such, or no, Not as in other's Thoughts, but our's, 'tis so.

OCTOBER hath XXXI Days.

Vain Men, seek but Appearances to save, Not Credit so much to deserve, as have. The less their Worth is, or their Virtue's Store, The Affectation of them is the more. But he who is in his own Conscience just, Needs not fear Fate, or Providence distrust.

DECEMBER hath XXXI Days.

Then will Distinctions of all Parties fall, And Englishmen supply the Name of all: And honest Zeal reciprocally move, To draw each other with the Cords of Love. Then by Consent our Fame will justly rise, And wast due Praises to the wondring Skies.

The Dominion of the Moon in Man's Body,

Paffing under the twelve Zodiacal CONSTELLATIONS.

- or Aries Head and Face.
- & Taurus Neck and Throat.
- Il Gemini Arms and Shoulders. & Sagittary Thighs & Hips.
- Cancer Breast and Stomach. by Capricorn Knees & Hams.
- A Leo Heart and Back.
- my Virgo Bowels and Belly.
- Libra Reins and Loins.
- m Scorpio Secret Members.

- Aquarius Legs & Ancles.
- * Pisces Feet and Toes.

The Names and Characters of the Planets.

With the Dragon's Head and Tail.

- Jupiter. o, or the Sun. S Mercury. & Dragon's-Head.
 - 8 Dragon's-Tail.

The Characters of the Aspects.

* Sextile.

Upon the Twelve Signs.

- The Head and Face the Ram doth always rule :
- The Neck and Throat are govern'd by the Bull.
- O'er the Arms and Shoulders fill the Twins preside:
- Breaft, Stomach, Ribs, the crooked Crab doth guide.
- The noble Lion rules the Back and Heart: D
- my The bashful Virgin claims the Belly Part.
- The Reins and Loins the equal Balance weigh :
- The Scorpion o'er the fecret Parts doth fway. m
- The curious Archer doth the Thighs affect : 1
- So doth the Goat our bended Knees protect.
- The Legs unto Aquarius' Lot do fall:
- * The Filb our active Feet their Portion call.

A CHRONOLOGY of many remarkable Occurrences from the Year 1600, to this present Year 1769.

P	cient real 1/09.	
Years	s of Christ Year	s fince
1600	King Charles I. born at Dumferling, in Scot. Nov.	10 160
1601	The Earl of Eyex beheaded	168
1603	Queen Elizabeth died, having reign'd 45 Years	166
1603	A great Plague in London, died 56570	166
1603	King James I crown'd, July 15th, at Westminker	166
1605	The Popish Gun-powder Treason, Nov. 5	164
1613	Lady Elizabeth married to Prince Palatine	156

A Table of some principal fixed Stars, with the Time they Rise, South and Set, either before or after the Seven Stars; as also their Colour, Magnitude, and Meridian Altitude, by which they may be readily discovered.

Co- lour	Alt.	Mag	Names of the Stars.	1 1 1 1 1		So h.	021	Še h.	ts m,
8	53	1	Aldebaran, or Bulls Eye	18	34	oz	48	ol	0
54	29	1	Left Foot of Orion	4	31	1	31	1	14
4 %	36	3	Middle * in OrionsBell	4	13	1	51	0	36
8 8	45	1	Right Shoulder of Orion	3	23	2	8	0	Š
8 8	21	1	Syrius, the great Dog	6	41	3	1		48
8	43	2	Procyon, the little Dog	5	33	1 3	53	21	7
5 8	30		Heart of Hydra	8	39	5	41	2	44
48	51		Regulius, Lions Heart	7	26	6	21	5	16
¥	54	1	The Lions Tail, Deneb	8	42	7	54	7	7
8 8	28	1	Virgins Spike	12	46	10	38	6	16
84	158	11	Arcturus	10	47	200	30	10	12
8	12	1	Antares, the Scorp. He.	17	16	12	30	7	42
Ь₩	46	2			38	1 .	3		27
2 9	6		Fomelhaut	11	14	10	11		37
4 9	56	2	Head of Andromeda.	10	42	10	10	2	56

THE brightest of the 7 *'s is of the third Magnitude, and hath 61 Degrees of Meridian Altitude, and in Colour participates of the p and y.

2. The fixed Stars all rife, fouth and fet about 4 minutes fooner every Night than they did the Night before; this confidered, the exact Time of their Rifing, Southing and Setting for any intermediate Night, not herein noted, may be very eafily deduced from these Tables, by inspection only.

To know the Time of the Rifing, Southing, and Setting of any Star in this Table, for any Day required, it is but confidering how many Hours and Minutes that Star Rifes, Souths, or Sets, either before or after the 7 Stars on that Day, and you will have your Defire; observing that in this Table, a stands for after, and b for before.

A Table shewing the Bearing, Distance, Longest Day, and Disserence of Meridians of most of the principal Cities in the World, from the famous City of LONDON.

of the ECLIPSES that will happen in this Year, 1769, from new and accurate Astronomical Tables.

FIVE Times this Year will the two great Lamps of Heaven be eclipsed, namely, three Times the Sun, and twice the Moon; which will happen in the following Order:

The first is a partial and invisible Eclipse of the Sun, on Sunday the 8th Day of January, about 3 o'Clock in the

Morning.

The second is also a partial and visible Eclipse of the glorious Body the Sun (or rather the Earth) on Sunday the 4th of June, in the Morning, as more clearly appears by the following Calculation for the Meridian of London, and may tolerably serve the whole Kingdom of Great Britain and Ireland.

	London.			
	H.	1	11	
The Eclipse begins -	6	48	11	
Middle of the Eclipse	7	38	0	
End of the Eclipse -	8	3	11	
Total Duration	1	15	0	
Digits eclipsed	5	5	oN.	

The third will be of the Moon, and happens on the 19th of June, at half an Hour past 8 o'Clock in the Morning, and consequently invisible to our Isle of Great Britain.

The fourth is another folar one, and happens on the 28th Day of November, at half an hour past 8 o'Clock in

the Morning; but it will be invisible to us also.

The fifth and last is a partial Eclipse of the Moon, and visible (if Clouds interpose not) to us in this Island. It happens on Wednesday the 13th Day of December, according to the following Calculation.

	London.	Edinburgh.

The

These Calculations are done from the same Tables, and by the same Person they were done by the last Year, viz. Mr. H. Andrews, of Royfon, in Herts, who very frankly gave me them, and tells me they are computed from the Tables of the celebrated Mr. Clairant; and he fays, they are not to be equalled for Exactness, though they are difficult to calculate from; and therefore, according to his Defire, I have inferted them for the Observation of the most curious Artists in Astronomy. But, as a certain Person says, Astronomy without Astrology is like a Lamp without Oil, or a Shell without the Kernel: And feeing Aftrology is a most excellent Science, but very laborious, and full of Difficulty, as I in the whole Course of my Writings have experimented for many Years. And Ptolemy, in his Days, observing so great a Variety of Matter. and the fundry Influences of fo many and great Stars, thought it a hard and difficult thing thoroughly and exactly to consider the cælestial Mixture; says, it is impossible for a Man, though ever so knowing, should distinguish the particular Forms of Things, even as Sense also receives not a particular, but a general Form of sensible Matter: And he that treateth of these Things must only conjecture, for none but those Persons that are inspired from above, can predict Particulars. He farther tells us, that there is something supercelestial that assisteth Men in predicting future Events; for an Aftrologer, as well as a Poet, is born, not made; for by the Synteræsis of the Stars, and of the Intelligences, we are able to prophecy of Things to come. Wherefore it is manifest, that only those who have the Knowledge of future Things, through the better Part of the Soul, come the nearest to the Truth. Since no Man can deliver his Judgment, according to the Operations of the Stars, untels he be fuch a Person as has well confidered the natural Complexion of the Soul; and therefore may be deservedly called and esteemed a wife Man. For the Soul doth affift in cælestial Influences and Operations, as the best Husbandman doth Nature, in ploughing and manuring the Earth; nor can any Man teach the Mixtures of the Stars, who hath not first learned their natural Differences and Tempers.

And so from these Considerations I proceed to give you my Judgment of this Year's Eclipses; but the three that

are invisible I shall pass over in Silence, well knowing that invisible Eclipses have neither good nor bad Effects. The first visible Eclipse is of the greater Luminary the Sun, on the 4th of June, in the Morning; and the other is of the Moon, on the 13th of December, in the Morning, according to the former Calculations. They are both celebrated in the Sign Gemini, near to the Hyades, and the Constellation of Orion, being Stars of the Nature of Saturn, Jupiter, Mars, and Mercury; and Mercury being chief Ruler of both the Eclipses, and not impeded either by Combustion, Retrogradation, or any male Aspect of the Infortunes; but in the Lunar is conjoined with Jupiter in his own domal Dignities, and is swift in Motion, from which Positions we say there will be Arguments of more than ordinary Councils on the Stage of the World, in most or all of the Courts of the Kings, Princes, and Potentates of Europe in general, and we hope may have good Effects to promote Peace and Tranquility, and the Advancement of some deserving Men to Honour, with the Augmentation of those Things that are necessary for human Subsistance. The Constitution of the Air will be windy and moift, but healthy and temperate, and fuch as will nourish Fruits. The Seas will be favourable to Navies, and the Merchant Ships come home richly laden; and Plenty of Fruits and of other Things, proper for the Well being and Prosperity of Man. The Times are coming, and not far off, wherein Corn will be cheaper, and Money more plentiful among Tradefmen. 'I is then the Commonwealth prospereth; Tradesmen circulate Money, Clowns and Misers either hoard it, or purchase Lands, both which bring no good to the Publick, but makes hard Times, breaks Iradesmen, and slarves the Poor: For when Corn and Cattle are dear, as they have been for some Years past, then are the most Part of Cornfactors and other Victuallers, fo intent upon filing their Bags, that they can afford nothing to the Poor; nor even can the Rich think of good House keeping, and the general Part of Mankind are much more milerable than when Things are cheap. But let all fuch know, that he is not rich that hath much, but he that hath enough; nor is he poor that bath but a little, but he that covers more: He to whom a little feems not enough, a great deal will feem but a little; and fo I've done with these Eclipses.

All Arts from the Creation did begin,
And all corrupted through the Stain of Sin;
For when that Adam fell, then Faults in all,
As a Difease, grew epidemical:
And so from thence ('tis to be understood)
Man's Knowledge is commix'd with Bad and Good,
Which to select, and orderly to place,
Does all Men's Actions wonderfully grace.

ASTRONOMICAL REMARKS for the Year 1769.

UPON Saturday, June 3, there happens a notable Transit of that glorious Planet Venus over the Sun, and is the last we shall have for above two hundred Years; and if I mistake not, is as large as that was in the Year 1761: But in this our Island of Great Britain the Immersion, or Beginning, will be seen only, as appears below. In several Parts of America, the whole Transit may be seen; where I desire the skilful Astronomer to prepare his Telescope, to observe the same, in order to determine that grand Problem of the Sun's Horizontal, &c. &c.

3d June, 1769, Evening.	St. Paul's.	In America, City of Mexico.

Central Ingress		0 45 58
True Conjunction -		
Middle		3 54 30
Central Egress		7 3 14

All Places lying West from the Meridian of London, the Inhabitants thereof will see more of the Transit than those which lie East. At London the Sun sets 9 Minutes past 8 that Even-

ing, and the more North the later.

On Thursday, Nov. 9, at 1 Minute past 10 o'Clock at Night, (being the Middle thereof) Mercury passes over the Sun, and wishle to great Part of the Continent of America; but to us in this Island no Part of it will be seen, for the central Ingress happens not till'32 Minutes past 7 that Evening, and the central Egress, or End, will be 30 Minutes past our Midnight. These Calculations I had from the aforesaid Mr. H. Andrews, at Royston, in Herts.

A POEM, shewing the Folly of Factions and Divisions in Contested Elections.

FOOLISH and vain is that contentious Strife, Which fours and robs us of the Sweets of Life.

What's that to us when Sides are up or down. Who's in or out, or who's in Favour grown? Our Rulers ev'n what they think fit will do, And care not how 'tis thought by me or you. Is't not a Jest to see a busy Fop, To leave his Labour, or neglect his Shop; To quarrel with his Father, or his Son, Deny his Friend, or his Religion, To get this Man a Vote, and t'other none? To raife among his Neighbourhood Debate, And Feuds in Counties and in Towns create? In Times of chufing Members, every Sot Believes the World depends upon his Vote. And nearer as Election days approach, Will for a Month together be debauch'd. Whether the Elected, or th' Elector paid, The latter loft his Reckoning in his Trade. Yet furely he would fit, and scarce afford The courtly Candidate a civil Word,. Nor own his Chapman, nor the Counter-board. Proud of his temporary Power, he swells And Tales of his prevailing Int'rest tells. But when the Sh'riff has taken the Return, He dwindles to a Wretch below your Scorn. Then he who as a Sage the Choice would rule, Returns to Nature, and resumes the Fool. What can be more prepofterous than to fee Two Friends about a Stranger disagree? Or formal Newsmongers o'er Tea reflect On this Commander's Heat, and that's Neglect. And Sots, in Cellars, or in Garrets bred, Infult, like Æfop's Serpent's Tail, the Head. How easy is it made by Fools of late, To scribble out Reflections on the State? And fuch as are for other Arts too dull, To be of Politics and Parties full. What Reams of fage Remarks have been produc'd, And are not, but for Pipes and Pastry, us'd. Sure, of all Plagues, Division is the worst, And wretched is the Land by Faction curst. The Joys of Conquest by our Strife we spoil, And render fruitless all our Heroes Toil. For Fame we fight, and Freedom, while our Foes More weaken by their Arts, than by their Blows : They feed the Flame of our intestine Jars, And deride our Follies before we are aware. Were we, as we should be, in Interest one, True to ourselves, and faithful to the Throne;

The World were ours, and Royal George would reign Sole Sov'reign of the Land as well as Main. He calls us to unite, He leads the Way, And we shall ne'er be bless'd till we obey, And banish Faction, that dire Fiend, away. Who like a Fury does her Malice vent, And blazons every trivial Discontent; Adds daily Fuel to each Parties Fire, And with deluded Zeal their Hearts inspire.

I Have told you formerly, how Things were represented by Hieroglyphicks. The following is a Bull tied to the Tail of a Ram, with a Crabfish on his Back.

The foregoing Hieroglyphick is a farther Confirmation of those past in my former Years, and of his Majesty's Power and Authority over the Kingdoms of Great Britain and Ireland. The Ram, you may observe, fignifies England, the Bull Ireland, and the Crab Scotland. Holland and Pruffia, &c. are also fignified by the Crab: This gives me Leave to conjecture, that those Kingdoms under Cancer, by the Mediation of Ireland, will be subservient to England. We may give Laws to, we shall never receive them from, any Nation under Heaven. I have borrowed so much Time from my Morning Sleep as has brought forth these Conceptions; if Providence shall prolong my Years, I may in some future Numbers declare unto the Sons of Art, the several Changes of every Kingdom and Commonwealth in Europe; but at this Time shall only add one Prophecy of St. Hermas, Bishop of Philippi, who, in his Book of the Vifions, does represent the future State of the Church by a fourfold Vision. In the first Vision, says he, I saw the Church in the Form of an old Woman fitting in a Chair. In the second, I saw her like an old Woman standing on her Feet, having a young young Woman's Face, but the Hair and Skin of an old Woman. In the third Vision, he faw her in the Shape of a young Woman, fair and comely, but with the Hair of an old one. And in the fourth and last Vision, I saw the Church in the Shape and Likeness of a young Woman, fair and comely. I beheld her, says he, like a beautiful Virgin, or new-married Bride, goodly and gay, coming forth of her Bride-chamber. By which Visions, he tells us, it was revealed to him, how the Church should fall by Degrees into divers Deformities and Corruptions, and decline from her primitive Integrity and Purity ; and that many schismatical Members should afflict the Head. and make it fick; but that, in the End, she should, by Degrees, be restored to her pristine Beauty: For her Change shall be as great, as if an old Woman should become young again, or one deformed and wrinkled should become both gay and beautiful. Then will the Bridegroom go forth to meet his Bride; she will look like the Rose of Sharon, or as the Lilly among the Thorns, the will look fair and comely, with Dove's Eyes, and her Locks like the Hair of the Flocks that appear from Mount Gilead.

Christ has a Spouse, always constant and true, In spite of all the Pope and Devil can do; The Scarlet Whore, and all her bloody Imps, Wait for her Blood, like rav'nous bloody Pimps.

Which brings me next to consider the four Seasons of the Year.

And first of the Brumal, or Winter Quarter:

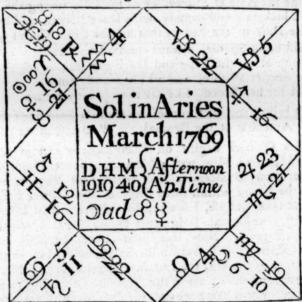

THIS Quarter begins on Wednesday the 21ft of December, 1768, at 24 Min. past , Mane, apparent Time, when 26 Deg. of Scorpio ascends, and 19 Deg. of Virgo culminates; but as the Moon within three Days of the Solftice fuffers a vifible and total Eclipse, I shall rather adhere to that Lunation, to give my aftrological Judgments from, for this Winter, than from the Ingress. Now this lunar Defect happens in the 3d Deg. of Cancer, with Saturn in the 2d, and Mars in the 11th, and Jupiter in the 6th, the Luminaries are only angular, the Sun in the 7th, and the Moon in the Ascendant applying to the Body of Saturn. From hence we fay, the Commonalty are uneasy, the People complain for the Want of Trade; and the Confultations of these Times are carried on with Difficulty and Trouble, and high Animofities and Differences do arife, especially East and North East from London; and were it not for the benevolent Aspects of the Sun and Mars, and of the two Superiors, we might juftly fear much Mischief might follow thereupon: But we hope the Wildom of some grave Persons in Council will very much qualify the unruly and diffempered Passions of the most violent and raging Spirits, and by Degrees compose Matters in Debate, and reduce them again to good Order,

Great Britain triumph, let thy Glory spread, Rous'd up, as one new-risen from the Dead. Heaven takes no Bribe, do but the Thing that's just, And be rewarded equal with thy Trust. No perjur'd Person, nor a Tyrant-State, Can be exempt from the Decrees of Fate.

The Diseases incident to this Winter Season are griping of the Guts, dry Coughs, Scurvy, Dropsy, fore Throats, Convulsions in Children, Tumours in the Legs and Knees: And thus much upon the Winter Quarter, or tropical Season.

In the next Place I shall consider the Spring-Quarter, which takes its Beginning on Monday, March 20, 40 Min. past 7

Mane, at which Time 21 Deg. of Taurus ascends, and 22 of Capricorn is on the Medium Coeli, and Jupiter in the 7th, and Mars in the 2d, the Sun and Venus in the 12th, and the rest are placed as in the following Scheme.

In this Figure I find no Planet angular but Jupiter, and he in the 7th, lately being in Trine with the Sun and Mercury, and applying by Opposition to Venus. This shews a good Understanding in Prince and People, and that all Matters should succeed well in the general, especially in the Beginning of this Quarter. In this Spring we may expect Matters of great Concernment, and very transcendent Importance, as to national and publick Affairs, will fall under serious Consideration; but I would have no Person mistake me, or think that I affirm these or any subsequent Configurations of the Planets to be the only immediate Causes of the succeeding in the World (whether

whether good or evil). No, I conclude and know by Experience. they are the Signs and Forerunners (in a natural Way) of such Actions or Accidents, which do very much sympathize or correspond therewith. I see no Reason in Art, but we in England may live in much Tranquility and Peace, if we will but endeavour so to do, and resolve to be ruled by Reason, and quietly submit to the prudent Government of our Superiors, as in Duty we are bound, without complaining or repining, without just Cause for the same. The Diseases of this Quarter will be many, and too many of them, I fear, will prove both violent and mortal. There feems to be great Disputes, and fecret Whisperings among the vulgar Sort in most Nations of Europe; and we may also expect many Dangers and Tribulations will attend their Persons. Paracelsus tells us, that many studious People, searching into Secrets of Nature, may by their good Genius have Mysteries revealed and discovered to them; and most Persons agree, that the Heavens are a large expanded Volume, in which may be read many grand Mutations (as Effects in the Bosom of their Causes, or Events prenotified by certain Signs) long before they are brought into Act here on Earth. But the natural Grounds or Dispositions of the coelestial Bodies, which, like mediate Links in the grand Chain of fecondary Causes, have produced, or at least cooperated in the Productions of these our present Disturbances. at the Time of my writing, or the extraordinary Phenomena which the Almighty makes use of to pre-signify his Will and Pleasure, are like Beacons, to admonish the World of such Chastifements, and cannot but most certainly deserve our more curious Observations and Enquiries

Lastly, to conclude this Quarter, I fear a fickly Season approaching, for many aged Persons (among others) make their Exit out of this World; and Death now in good Earnest designs to feed upon Dainties: And therefore in all thy Glory, memento mori. Other Things might be intimated, but I shure

up all with thefe fignificant Lines:

What Sot would go plot, when his Lot is a Rope,

What Fools will be Tools, and Slaves unto Knaves, for Hope. The Wife that wear Eyes will despise such Temptations, And learn to discern their own Peace must cease with the Nations. Quiet is Diet, those that try it shall find, More sound than is sound in a Crown by a restless Mind.

Of the Summer Quarter.

THE Summer Quarter begins at such Time as the Sun enters the tropical Sign Cancer, which this Years happene on Wednesday the 21st of June, at 2 Min. past 6 in the Morn.

THE Autumnal Quarter begins September 22d. at 26 Minutes past 7 in the Evening, in which are some rugged Aspects and Positions; but what I have said under the former Quarters, as I designed them for the general Judgment of the Actions of the whole Year, I need not make Repetition.

IN ERE it not for incurring the Character of Vain Glory, or Oftentation, I should before now have reminded the Adversaries to Astrology of several remarkable Truths, which I have predicted in these my annual Books from celestial Causes. of which I doubt not but many of my Readers have taken Notice; and fuch Persons as have compared my Discourses of the laft, as also of former Years, with the Affairs and Transactions of those Times, but especially fince the Year 1764, cannot deny the Congruity: For in that Year, I told you the Effects of the folar Eclipse on the first of April would endure-for three Years after the first of August following, where I said that Fruits would be more than commonly spoiled with too much Drought, for the Frosts at Spring blasted them. I leave you to confider, whether ever you knew a greater Scarcity of Fruit; for I was informed by the Papers, that Apples last Winter were fold in Covent-garden for seven Guineas a Bushel; and likewise in the Year 1765, I said, that ere the Effects of the Eclipse will go over, it was much to be feared that we should see fresh Troubles, and great Divisions and Differences in Opinions, Neighbour still murmuring against Neighbour, Brother against Brother, et quid non? And in 1766, I told you the Parelij, or Mock-Suns, would be the Messengers of Tumults, Treacheries, not of much Bloodshed; but they foreshow many treacherous Great Ones among our Grandees, and a tyrannical Oppression of the People. And likewise in 1767, I said probably there would be notable Struggles and Debates in many Places about Religion, Discords among great Men, some Uproars and Disturbances in England, especially London; factious Spirits will endeavour to promote their Ends and Interest, and some of the superior Quality and Degree do act very highly, and many high and weighty Confultations, tending to the Regulation of old Customs and Privileges, and the Extirpation of Thus far I have writ, whether these Things have or have not happened, I leave my Readers to determine. And as for the Comet that appeared in April 1766, we labour still under the Effects of it, and shall do for Years to come; and so I conclude my Book with these Words:

May all the Bleflings of Almighty God attend our most gracious Sovereign King GEORGE, with the Lords and Commons affembled in Parliament; and may Great Britain

enjoy all Felicity this Year and evermore.

FINIS.
